Lahore, Pakistan | fabiyanoor7@gmail.com | [linkedin.com/in/fabiyanoor](https://www.linkedin.com/in/fabiyanoor) | github.com/fabiyanoor

SUMMARY

I am a software engineer and practitioner of machine learning who has experience creating data-driven applications, APIs and NLP/LLM pipelines (PyTorch, BERT, LangChain). My experience ranges from working on transformer models to detect disinformation to being a back-end engineer on ASP.NET Core/C# projects and data analytics projects. I have been certified by Microsoft on AI-900 (Azure AI Fundamentals).

WORK EXPERIENCE

Software Developer, Agile/Scrum Team | AllSpice Technologies (Australia), Remote *Jan 2025 – Present*

- I designed and built RESTful APIs for AllSpice Technologies, handling how data moved between client and server. I used SQL Server to keep that data validated and consistent, mainly for checkout and ticketing workflows.
- I built web applications using ASP.NET Core, C#, Blazor, and Entity Framework, including an admin ticketing system for tracking and reporting on operational data.
- I debugged and fixed data integrity and production issues across the stack, working closely with the UI/UX team in Agile sprints. I kept everything organized in Git and GitHub.

Community Project Intern | Asian Youth Leaders Organization (AYLO), Remote *Jun 2026 – Aug 2026*

- I collected and organized data on international universities to support an outreach campaign for AYLO.
- I built a full business proposal and presentation for a tutoring venture called DualTrack, including market and audience analysis, for a training session on youth entrepreneurship.

Data Science Intern | HexSoftwares, Remote *Apr 2026 – May 2026*

- I spent two months working on data science tasks, cleaning and analyzing data and building models to better understand it. It gave me practical, hands on experience applying what I'd learned.

TECHNICAL PROJECTS

TruthLens AI. Misinformation Detection Platform | Python, PyTorch, BERT, Flask, REST API

- I built a fake news detection pipeline, covering data preprocessing, feature engineering, and model training. I combined ensemble models, custom transformer architectures, and rule based pattern detection to produce a real time confidence score.
- I fine tuned a BERT transformer for real time classification and deployed it as a live Flask REST API, complete with scoring, confidence metrics, and documentation.

Resume Analyzer and Career Advisor. LLM Platform | Python, LangChain, Groq API, Streamlit

- I built a generative AI platform using LangChain and the Groq API to pull structured data out of resumes for job matching, skill gap analysis, and interview prep questions.
- I designed the prompt engineering pipelines and built interactive Plotly dashboards to turn unstructured text into something consistent and analyzable.

Halal Verifier. Public REST API | C#, .NET 8, ASP.NET Core, EF Core

- I built a production ready .NET library and REST API that verifies the Halal status of products through automated ingredient and barcode analysis, integrated with the Google Gemini API.

VenueVista. Venue Management App | .NET MAUI, ASP.NET Core, SQLite

- I built a cross platform venue management application with a relational data layer and backend integration for venues, users, and bookings.

TECHNICAL SKILLS

Languages: C#, Python, JavaScript, SQL, C++

AI and ML: PyTorch, BERT/Transformers, LangChain, LLM APIs, Prompt Engineering, scikit learn, Feature Engineering

Data Engineering and Storage: SQL Server, Entity Framework Core, REST API Design, ETL style Data Pipelines, Data Cleaning and Validation

Data Visualization and BI: Power BI, Plotly, Matplotlib, Azure AI Services (AI-900 Certified)

Backend and Tools: ASP.NET Core, .NET Core, Blazor, Git, GitHub, GitLab, Docker, VS Code, Jupyter Notebook, Agile/Scrum

EDUCATION

B.Sc. Computer Science. Lahore College for Women University (LCWU), Lahore, Pakistan

HEC Recognized. CGPA: 3.61/4.0

Dec 2023 Present (Final Year)

Coursework: Database Systems, Artificial Intelligence, Data Structures and Algorithms, Software Engineering, Computer Networks, OOP

CERTIFICATIONS

Microsoft Certified: Azure AI Fundamentals (AI-900). Google AI Essentials. Foundations of Data Science. Crash Course on Python (Google/Coursera)
