PROFESSIONAL SUMMARY

I am a Computer Science student who genuinely loves building things that matter. What started as curiosity has grown into a focused passion for intelligent systems, data-driven thinking, and research that bridges theory with real-world application. I am energized by the full arc of a problem, from exploring ideas and designing solutions to building them and presenting findings in ways that truly connect with people. I thrive in environments that challenge me to think rigorously, collaborate meaningfully, and continuously grow as both a technologist and problem-solver.

EDUCATION

Lahore College for Women University | CGPA: 3.58 Lahore, Pakistan
B.Sc. Computer Science — Software Engineering, Data Structures, Algorithms, Databases Dec 2023 – Present

WORK EXPERIENCE

Allspicotech Lahore, Pakistan
Software Developer Feb 2025 – Apr 2026

- Delivered **enterprise-grade software** in an Agile/Scrum team across sprint planning, defect tracking, and continuous improvement cycles on multi-developer, version-controlled projects.
- Built and validated **RESTful API integrations** (ASP.NET Core, Entity Framework) for production web applications, ensuring data integrity and seamless client-server communication.
- Authored **technical documentation** for APIs and system components; conducted peer code reviews and cross-functional debugging sessions to strengthen team engineering standards.

TECHNICAL PROJECTS

TruthLens AI — NLP Misinformation Detection | *Python, PyTorch, BERT, Flask, REST API*

- Architected a misinformation detection system using a **fine-tuned BERT transformer**, deployed via Flask REST API with real-time prediction scoring. Conducted end-to-end model accuracy evaluation and documented system architecture and performance findings for technical review.

Intelligent Resume Analyzer — LLM-Powered Platform | *Python, LangChain, LLMs, Streamlit*

- Engineered a platform integrating **LangChain and LLM APIs** to parse CVs, perform automated skill-gap analysis, and generate personalized learning roadmaps with interactive visualizations — demonstrating end-to-end competency in **LLM orchestration and prompt engineering**.

Cyclomatic Complexity Analyzer — Research-Grade Quality Tool | *Python, AST, Graphviz*

- Built a **static code analysis tool** using Abstract Syntax Trees to auto-generate control flow graphs and compute complexity metrics. Produced a **structured technical report** translating program structure into data-driven quality insights for software engineering research.

Halal-Verifier — Public REST API | *C#, .NET 8, ASP.NET Core, EF Core*

- Designed and deployed a **scalable public-facing REST API** for ingredient classification with robust error handling for ambiguous barcodes and malformed inputs. Documented API endpoints and usage guidelines for external developer adoption.

TECHNICAL SKILLS

Languages: Python, C#, JavaScript, SQL

AI & Data: PyTorch, BERT/Transformers, LangChain, LLMs, scikit-learn, Pandas, NumPy, Data Visualization, Prompt Engineering, Azure AI Services

Frameworks & Tools: ASP.NET Core, Flask, Streamlit, .NET MAUI, Blazor, Entity Framework Core, Docker, Graphviz

Developer Tools: Git/GitHub, GitLab, VS Code, Jupyter Notebook, SQL Server

Practices: Agile/Scrum, API Design, System Testing, Technical Documentation, Research Writing, Presentation & Communication

CERTIFICATIONS

Microsoft Certified: Azure AI Fundamentals (AI-900)	Microsoft, 2026
Google AI Essentials — Practical AI, prompt engineering, AI safety & ethics	Google/Coursera, 2024
Foundations of Data Science	Google/Coursera, 2024
Data, Data, Everywhere	Google/Coursera, 2024
Crash Course on Python	Google/Coursera
CS107: C++ Programming	Saylor Academy
